

# WHY

is your neighbor's  
GRASS GREENER?

maybe they already know . . .

 ***MOW HIGH - 3 inches is the rule! This promotes healthier roots and a healthier lawn.***

 ***Only cut  $\frac{1}{3}$  of the blade each time you mow and leave your grass clippings on the lawn. They're the ideal fertilizer; packed with nutrients.***

 ***Tall grass will often shade out unwanted weeds and can tolerant hot conditions better, saving you money on fertilizer and water.***
